Economic sentiment declines in the euro area but remains stable in the EU

In October the *Economic Sentiment Indicator* (ESI) remained unchanged in the EU, at 86.2, and declined by 0.7 points in the euro area, to 84.5. In the EU, marked declines in the industry and construction sectors were offset by improvements in services and retail trade. Consumer confidence remained broadly unchanged. In the euro area marked decreases in industry and construction outweighed the improvement in the retail trade sector, while confidence in services and among consumers remained broadly stable. Overall, the decrease in the ESI has lost pace since September in both areas and has even come to a halt in the EU in October.

Although the majority of the Member States witnessed a drop in economic sentiment, this was only the case for three out of the seven largest Member States: the ESI registered falls in Poland (-2.8), France (-1.8) and Germany (-1.4). However, the ESI continued last month's recovery in the UK (+5.2) and Spain (+1.8) and rose slightly in the Netherlands (+0.8) and Italy (+0.5).

Confidence in *industry* continued the downward trend reported since March. The confidence indicator decreased by 1.2 points in the EU and 2.1 points in the euro area. In both regions, the decline is mostly due to a much more negative assessment of the current level of *overall order books*. In the euro area also the other two components (*production expectations* and *stocks of finished products*) worsened, while in the EU, managers' *production expectations* remained broadly stable and their assessment of *stocks of finished products* improved. In both areas managers' assessment of their companies' *past production* and current level of *export order books* deteriorated markedly, too. Confidence in *services* improved in the EU (+0.7) and remained broadly unchanged in the euro area. In both areas, managers' *demand expectations* improved while their assessment of *past business situation* remained broadly unchanged. Views on *past demand* improved in the EU as well, but deteriorated in the euro area. Confidence in *retail trade* picked up in both the EU (+2.4) and the euro area (+1.1). In both areas, the *present business situation* and the development of the current *volume of stocks* were viewed more positively, while the assessment of the *expected business situation* improved in the EU but declined in the euro area. Confidence in the *construction* sector decreased in both the EU (-2.6) and the euro area (-1.2). In the EU, the decrease was attributable to a more negative assessment of both *order books* and *employment expectations*. In the euro area views on the first component remained broadly stable.

In both regions, *employment plans* were further revised downwards by retail trade and construction managers. In the industry and services sectors employment plans were revised upwards in the EU, but downwards in the euro area. *Selling price expectations* decreased or remained stable in all sectors but industry, where managers expect price increases.

Consumer confidence remained broadly stable in both the EU (-0.3) and the euro area (+0.2). While consumers in both areas viewed the *future general economic situation* less pessimistically, their *unemployment expectations* worsened. In the EU, consumers' expectations about their *households' financial situation* and their *savings* over the next 12 months remained broadly unchanged, while both improved in the euro area.

Confidence in *financial services*, which is not included in the ESI, increased strongly in both the EU (+8.7) and the euro area (+7.4). The increases were driven by markedly improved assessments of the *past business situation*, *past demand* and *demand expectations*.

In the quarterly survey of the manufacturing industry, carried out in October, industrial managers in the EU and the euro area reported no changes in the *number of months of production assured by orders on hand* compared with the previous survey carried out in July. However, their assessment of *new orders* and *export volume expectations* decreased markedly. Managers' appraisal of their *competitive position on foreign markets outside the EU* remained broadly stable in the EU and improved slightly in the euro area. The balance of managers reporting more than sufficient, rather than insufficient, *production capacity* increased further. Accordingly, *capacity utilisation* decreased, to 77.3% in the EU and 76.8% in the euro area.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2a: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

Capacity utilisation in manufacturing industry (%)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	22 November 2012
	Economic Sentiment Indicator	29 November 2012
	Business Climate Indicator for the euro area	29 November 2012
