

BUSINESS AND CONSUMER SURVEY RESULTS

September 2012

Graph 1: **Economic sentiment indicator (s.a.)**

source: European Commission services

Economic sentiment continues to decline in both the EU and the euro area

In September the *Economic Sentiment Indicator* (ESI) decreased by 0.9 points in the EU, to 86.1, and by 1.1 points in the euro area, to 85.0. In both areas, the decrease was due mainly to weaker confidence among services and retail trade managers, and consumers. While confidence in industry decreased in the euro area as well, it remained broadly stable in the EU. On the positive side, construction managers in both areas were less pessimistic than in August.

Among the largest Member States, sentiment worsened in Poland (-2.2), France (-1.6), the Netherlands (-1.2) and Germany (-1.1), while it improved in the United Kingdom (+0.4) and in Spain (+1.3). Sentiment remained broadly unchanged in Italy (-0.1).

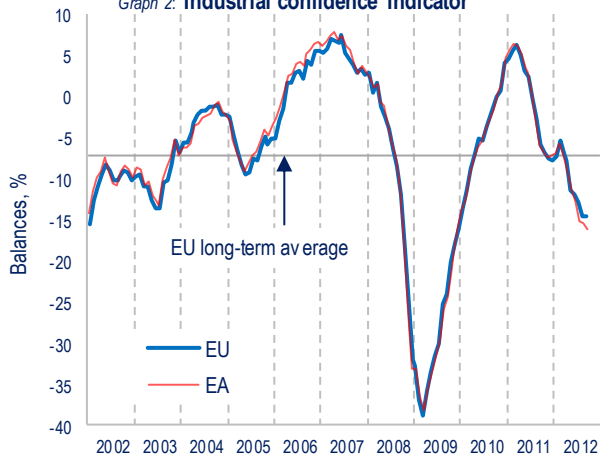

The downward trend of confidence in *industry* came to a halt in the EU (+0.1) but continued in the euro area (-0.7). In both areas, managers' *production expectations* continued to deteriorate, although the decline was less significant in the EU. Their assessment of the current level of *overall order books* improved in the EU but worsened in the euro area. Managers' assessment of the adequacy of their *stocks of finished products* improved in the euro area and was stable in the EU. After a temporary improvement in August the assessment of *past production* deteriorated again in both areas. Managers' assessment of *export order books* deteriorated in the euro area and remained broadly stable in the EU. For the sixth consecutive month, confidence in *services* declined in both the EU and the euro area (both -1.2). This decline resulted from deteriorations in all the components of the indicator. Confidence in *retail trade* decreased again in the EU (-1.8) and the euro area (-1.4). The *present* and the *expected business situation* as well as developments in the *current volume of stocks* were clearly assessed as more negative. Confidence in the *construction* sector increased in the EU (+1.6) and the euro area (+1.2), attributable to a more positive assessment of *employment expectations* that outweighed more pessimistic views on *order books*.

In both areas, *employment plans* were revised downwards for industry, retail trade and - to a lesser extent - services. *Selling price expectations* were up in all sectors, in both the EU and the euro area.

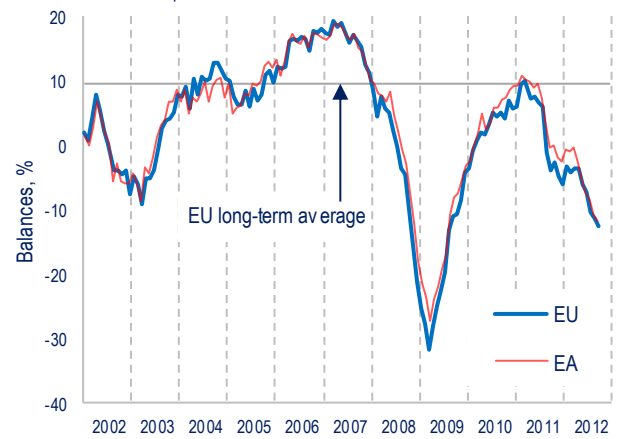

Consumer confidence weakened by 1.3 points in both the EU and the euro area, driven by worsened expectations about the *general economic situation*, their households' *financial situation* and their *savings*. However, following the steep increase over the past three months, consumers' unemployment fears broadly stabilised.

Confidence in *financial services*, which is not included in the ESI, declined in the euro area (-1.0) but remained stable in the EU. A marked improvement in *demand expectations* in the EU balanced decreases in the two other components of the indicator (*past business situation* and *past demand*). Small improvements in the assessment of *past* and *future demand* in the euro area were not enough to outweigh the more marked decrease in the assessment of the *past business situation*.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu
